

Pathway to Licensure

Complete Association of Professional Engineers
of Nova Scotia (APENS) Assessment Application

Board of Examiners
(The Board of Examiners assigns a reviewer of the same discipline to each applicant. The reviewer makes a recommendation to the Board of Examiners. The Board of Examiners determines the requirements for registration.)

Engineer

Explanation of terms:

The basis for registration with APENS is a CEAB accredited bachelor of engineering degree. If the Bachelor of Engineering degree is from an institution in a country that does not have an agreement with Canada, the APENS Board of Examiners must assess the applicant's academic and experience qualifications and may assign exams to confirm academic qualifications.

CEAB - Canadian Engineering Accreditation Board. The CEAB was established by the Canadian Council of Professional Engineers (CCPE) to accredit Canadian under-graduate engineering programs.

CCPE - Canadian Council of Professional Engineers.

CCPE List of Recognized Institutions - A list of international institutions meeting criteria established by the Canadian Engineering Qualifications Board (CEQB) of CCPE.

Confirmatory Exam Program - A standard set of examinations, from the CCPE Examination Syllabus, assigned to confirm academic qualifications of candidates who have a recognized Bachelor degree in engineering. There are usually four exams in the Confirmatory Exam Program.

Structured Confirmatory Exam Program - A standard set of examinations, from the CCPE Examination Syllabus, assigned to confirm academic qualifications of candidates who have an unrecognized Bachelors degree in engineering. There are usually six exams in the Structured Confirmatory Exam Program.

Interview Option - Candidates who have more than 10 years of engineering experience may be offered the interview option, at the discretion of the Board of Examiners, to determine if exams may be waived or reduced.

A list of fees is available at www.apens.ns.ca
